

# Betabio Full

The only totally plant NPK

Organic phosphorus of vegetable origin

PHY

Increase of nutrient efficiency (vehiculation, modulation, absorption)

AA

GLY

Energy for plants and useful microorganisms

AA

GLY

Regulates and balances plant growth (roots, shoots, fruits)

AA

Intensifies photosynthetic activity and increases productions

AA

Products available in:

25 kg tank

IBC of 1250 kg

AA

The amino acid complex particularly rich in Glutamic Acid, in addition to being a precursor for the synthesis of all the other essential amino acids, increases the synthesis of chlorophyll, regulates the stomatal opening and increases the fertility of the pollen.

The totally vegetal origin of the Amino Acidi contained in the ED & F Man products allows its application without any restriction on all edible parts of the crops.

PHY

Mainly made up of phytates, it provides the plant with a readily assimilable and highly energetic phosphorus. Particularly useful in the early stages of the development of new plants and in the stages of vegetative growth of trees as they favor the recharge of ATP and the biosynthesis of proteins of growing tissues.

Phytates are extracted mainly from seeds and dried fruit where they represent the energy part for the development of the new plant.

GLY

Mainly made of sucrose, they are easily absorbed by the plant as they are made up of simple carboxylic chains. They help to convey other elements within plant tissues and at the same time provide energy to cultivated plants. In the soil they favor the development of useful micro-organisms contributing to plant well-being.

The sugars contained in the ED & F Man products are extracted from plant tissues (beetroot and sugar cane).
